WORK EXPERIENCE

Software Developer | Ericsson Nikola Tesla

September 2022 - current

- Worked with a group of IT professionals in an agile team to develop proprietary, secure and fast telecommunication network software using the Spring Boot framework
- Acted as a Security Master for a cross-functional team resolving any product related vulnerabilities
- Addressed regular production improvements in existing Java microservices using Kanban to prioritize requirements and utilizing CI/CD pipelines
- Designed and coded unit tests for parts of software assuring best practices and code coverage using the Mockito framework in Java

Summer Bootcamp | Ericsson Nikola Tesla

April 2022 - August 2022

- Learned about Linux systems, the microservice architecture and cloud based systems at the theoretical part of the Bootcamp
- Built a chat application consisting of three microservices using above mentioned technologies and the Java programming language with the Spring Boot framework in the practical part of the Bootcamp

SKILLS

- | | | | |
|--------------|---------|--------------|---------------|
| • TypeScript | • HTML5 | • Docker | • CI/CD |
| • JavaScript | • CSS | • Kubernetes | • Spring Boot |
| • Java | • Sass | • Git | • Linux |
| • React | • SCSS | • JIRA | |

PROJECTS

MyNews | Single page web application

- Browse featured and latest news or search for specific news articles, save articles as favorites
- Built with React, Typescript and SCSS
- Fully responsive
- API calls for fetching data, React Router

Moneytown | Single page web application

- Budget your spending, provide multiple budgets, access your spendings, remaining money, add spendings
- Built with React, JavaScript and CSS
- Fully responsive
- React router dom (loaders, actions, useLoaderData etc)

Travelshare | Full-stack web application

- Share your travel photos with your friends or other people, like people's photos, edit your profile and follow users
- Built with MongoDB, Express, React and Node
- Fully responsive
- Custom React hook for sending http requests, file upload middleware, json web token for secure information transmitting, React router

Notio | Single page web application

- Write, save and edit notes in a modern and simple notes application
- Built with React, TypeScript and SCSS
- Fully responsive
- Browser storage for saving notes data, React Router, Framer motion for animations

ABOUT ME

- A very open and communicative person, happy to work in team environments but also undertake solo tasks
- Proficient in English
- A responsible person who takes pride in what he does and believes every problem is an opportunity to learn something
- A huge gaming nerd who loves playing board games, working out, watching TV shows and hanging out with friends
